PEDIATRIC TRACK (EXPANDED 2-DAY PROGRAM)

Pediatric Dentistry and Lasers

Academy of Laser Dentistry - Two Days of Pediatric Learning Lasers

Friday April 7 Saturday April 8 2017

Clinical Applications of Lasers for Infants, Tots, and Teens

This year the ALD presents a meeting within a meeting. 2017 presents something for the new pediatric laser dentist and something for the experienced pediatric dentist. ALD is pleased to welcome many new pediatric dentists to our organization. We are now introducing a new concept and an updated two-day pediatric program. Over two days we will cover topics from soft and hard tissue procedures on children, Photobiomodulation uses in a pediatric practice, protecting your reputation and practice management topics. Friday's schedule addresses the needs of the novice laser user. Saturday offers a more comprehensive day for infants and what dentists need to know to do post surgically for these infant patients. We have invited speakers in the areas of myofunctional therapy, International Board of Lactation Consultants (IBCLCs) and others. It is recommended that everyone attend the entire ALD meeting and learn how laser dentistry has changed pediatric dental care forever.

Saturday –Sunday May 6-7 The Raphael Center for Integrative Orthodontics - Clifton, NJ ...

A Dental Perspective on Oral Function Tongue-ties, lip-ties , lasers/ IBCLC, Myofunctional therapy and much more Lawrence Kotlow DDS, Jennifer Tow IBCLC, Sharon Vallone D.C. , Barry Raphael DMD
